### Physical Therapy Aide – Drumright Only

Physical therapy aides help physical therapists provide treatment that improves patient mobility, relieves pain, and prevents or lessens physical disabilities of patients. Physical therapy aides perform a variety of tasks under the direction and supervision of physical therapists as part of the patient’s treatment. This might involve exercise, massage, electrical stimulation, paraffin baths, hot and cold packs, traction, and ultrasound. Physical therapy aides record the patient’s responses to treatment and report the outcome of each treatment. The duties of aides include some clerical tasks, such as ordering depleted supplies, answering the phone, and filling out insurance forms and other paperwork. The extent to which an aide performs clerical tasks depends on the size and location of the facility.
