Why Central Tech?

Central Tech currently maintains 94% placement for students entering the workforce or continuing their education. Of those in the workforce, 88% of working graduates are employed in jobs related to their career major.

Since Central Tech collaborates with business and industry partners, instruction remains career-focused, aligning the necessary credentials with the high-demand occupations in our district. Curriculum incorporates problem solving, critical thinking, and teamwork into the assignments. Students complete their training by earning industry-recognized certifications/licensure, driven by the demands of these high-skill industry sectors.

Central Tech believes... "We are your workforce," and for good reason. The Oklahoma Office of Workforce Development predicts that by 2025, more than half of all new jobs will require advanced credentials through associates/certificate/credential training and less than one quarter of all jobs will require a bachelor's degree or higher. Central Tech is the economic engine connecting education and training to specific jobs, resulting in the production of a relevant workforce in Oklahoma.

Central Tech...everyone achieves success.
